Flush Sash
Gasket

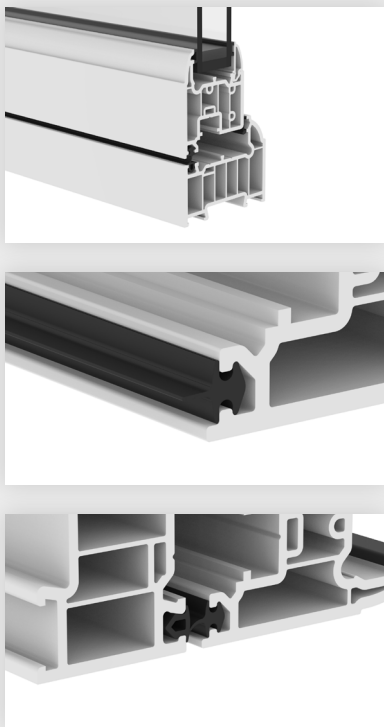

LM0343
Flush Sash
Corner Gasket

Designed for use with the **70mm flush window system**, this alternative to brush pile has been developed in conjunction with Schlegel, extruded gasket technology experts.

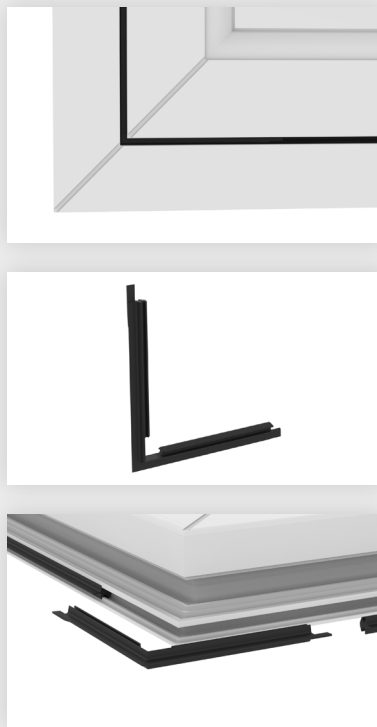

The two-part, flush gasket system features an overlap allowing for expansion and contraction, and maintains improved seal integrity during seasonal temperature changes.

- **Improved seal integrity, enhanced air tightness and resistance to water ingress**
- **Fabricator-friendly design, push-fit insertion**
- **Corded gasket helps prevent overstretching and shrinkage**
- **Improved appearance - sleeker, cleaner shadow lines than brush pile**
- **Robust material, enhances durability around friction stays**
