MANUFACTURING EXCELLENCE

QUALITY DRIVEN, SERVICE FOCUSED

Liniar is a world class, forward-thinking PVCu systems house offering premium products for enhancing homes and gardens - all sustainably manufactured in Britain. By being quality driven and service focused, we're committed to helping position our customers for success.

MOST ADVANCED SYSTEMS ON THE MARKET

Our PVCu window and door profiles, the most technically advanced on the market, are designed to surpass energy performance requirements such as the Future Homes Standard and include a Passivhaus-capable range (considered the gold standard for energy performance).

MEET EVOLVING MARKET TRENDS

Liniar profiles have been tested to PAS24 security standards and the Secure by Design initiative. A wide variety of style options and an expansive colour range mean you can easily cater to evolving market trends, while satisfying your customers' needs across projects of all sizes in new-build, residential and commercial sectors.

INDUSTRY EXPERTS

Become a Liniar fabricator and benefit from industry experts offering tailored support and seamless integration.

Begin your journey of shared success with the trusted partner to some of the largest and fastest growing window and door suppliers.

A PART OF SOMETHING BIGGER

A CONNECTED PATH TO GROWTH AND SUCCESS WITH QUANEX EXTRUDED SOLUTIONS

Quanex leads the market in high performance building product components and systems. With 67 sites worldwide selling into 46 countries, Quanex is a pioneering manufacturer with a global footprint.

Quanex Extruded Solutions is built on the combined strengths of Liniar, Avantek Machinery, Edgetech, and Schlegel, offering Liniar customers a smarter, more connected path to growth and success.

Liniar is the only UK systems house to be fully integrated into a wider division specialised in the manufacture and supply of fabrication machinery, spacer bar technology and sealing solutions.

Benefiting from ongoing investment, a single point of coordination, and a continuous improvement culture, each Quanex company is truly ***A Part of Something Bigger®***.

Avantek®

HOME OF THE SUPERCUT CUTTING AND MACHINING CENTRE

Avantek Machinery supplies state-of-the-art machinery and premium consumables for PVCu and aluminium window and door fabrication. Financial backing from Quanex allows Avantek to hold machinery stock, meaning it can deliver on the shortest lead times in the industry.

Known for providing expert support - from bespoke production line development to training and maintenance - and in-house innovations like the SuperCut series, Avantek helps fabricators achieve consistent quality, boost efficiency and stay competitive in the fenestration market.

Edgetech®

SMALL COMPONENTS WITH A BIG IMPACT

Edgetech IG (UK) Ltd, is a leading manufacturer of warm-edge spacer technology for insulating glass units. With over 35 years of innovation, Edgetech delivers energy-efficient, high-performance solutions that enhance window and door performance, support automation, and help customers around the world meet modern building regulations and achieve stunning designs.

Schlegel

HIGH PERFORMANCE SEALING SOLUTIONS

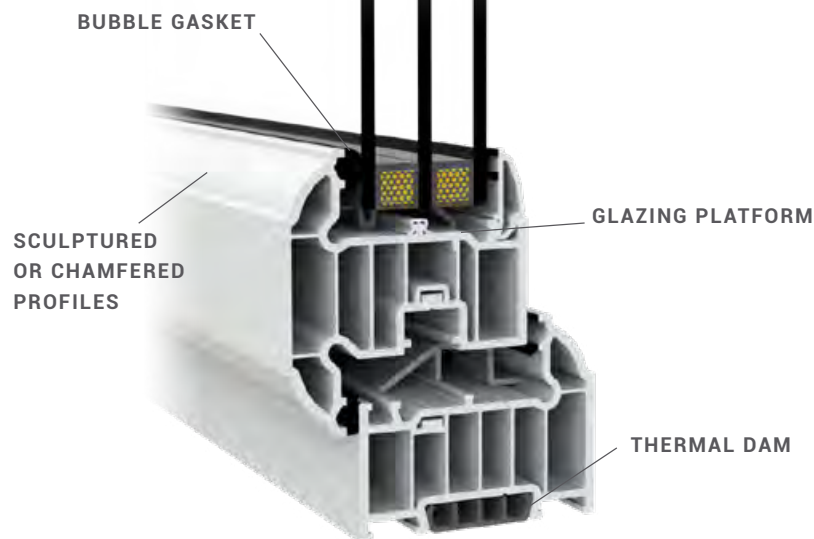

Schlegel International is a global leader in high-performance sealing solutions for the fenestration industry - specialising in foam, brush pile, and extruded seals under trusted brands like Q-Lon and Aquamac.

With facilities worldwide, they deliver a product portfolio capable of enhancing energy efficiency, durability, and weather resistance in windows and doors, supporting fabricators with versatile, long-lasting products.

PVCU PROFILE SYSTEMS

Our highly energy efficient PVCu profiles are the most technically advanced on the market and incorporate a combination of design features which push the boundaries of structural and thermal performance.

OUR STOCKED FOIL & COLOUR RANGE

Includes 35 vibrant colours, with a staggering 3,330 total colour combinations available.

SCULPTURED & CHAMFERED OPTIONS

Liniar profiles come in sculptured and chamfered options and allow you to cater to individual requirements while offering a full range of window and door styles.

MULTI-CHAMBERED STRUCTURE

Designed to maximise insulative properties for optimal thermal performance.

FABRICATOR FRIENDLY

Requiring almost 67% less steel reinforcement than a standard GGF window with no compromise to strength, Liniar profiles make fabrication easier and more cost-effective, and result in lighter, more installer-friendly finished products.

UNIQUE GLAZING PLATFORM

Improves drainage, provides additional structural rigidity and features an angled leading edge for easier glazing and reduced risk of damage to IGUs during installation.

PATENTED CO-EXTRUDED BUBBLE GASKET

Reduces operations needed during corner cleaning cycle, further increasing manufacturing efficiency and delivering more reliable corner seals for better weather performance.

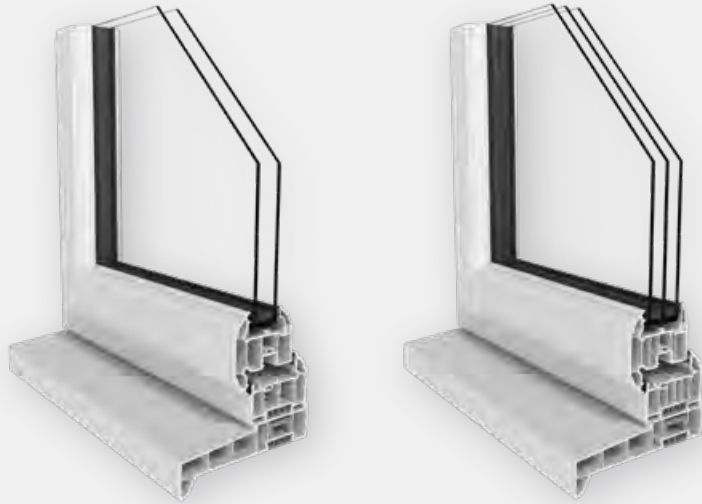

PATENTED MODLOK BI-FOLD EXOSKELETON

A unique modular exoskeletal combined lock reinforcement system encasing PVCu doors in aluminium.

Stand out by making your business
a one-stop shop for fenestration
enhancements and building
product solutions.

Elevate

LANTERN ROOF SYSTEM

Built for long-term performance with a sleek aesthetic, Liniar's Elevate lantern roof system incorporates patented technology and is engineered to allow easy installation and deliver year-round comfort.

DURABLE TWIN-WALLED TOP CAPS

Enhance structural integrity and thermal efficiency

PATENTED GLAZING STOP

Eliminates IGU slippage for 'fit and forget' peace of mind

PATENTED WEATHER DAM

Impervious to water ingress provides increased weather protection

Conservatory

ROOF SYSTEM

Each Liniar conservatory is beautifully designed and made to your own individual style, using your choice of Liniar windows and doors combined with a variety of bespoke roof shapes.

WIDE VARIETY OF STYLES

Available in Victorian, Edwardian, Gable, Double-hipped, Lean-to, P or T shaped

SLIM INTERNAL SIGHT-LINES

Aluminium construction with uPVC EnergyPlus top caps to let in more light

THERMALLY EFFICIENT

EnergyPlus top caps reduce the transfer of heat, keeping your room comfortable.

Roofline

BUILDING SOLUTIONS RANGE

Manufactured to the same exacting standards as Liniar's profile and foiled in the same state-of-the-art facility, our roofline range comprises shiplap cladding, fascias, soffits and a wide variety of trims.

FIRE SAFETY COMPLIANT

Soffits and fascias achieve Class 1 fire rating, with hollow soffits achieving Class 2.

PERFECTLY COLOUR MATCHED

Seamlessly combines with the full Liniar product family.

IDEAL FINISHING TOUCH

Extruded to perfection for a boldly defined shape and smooth texture.

DECKING & FENCING

As the biggest supplier of PVCu and composite decking to the UK's holiday parks, Liniar's decking, balustrade and fencing range is trusted by established operators including Bourne Leisure and Don Amott Parks.

OUTDOOR
RANGE

FULLY REVERSIBLE

Choice of grooved or woodgrained pattern

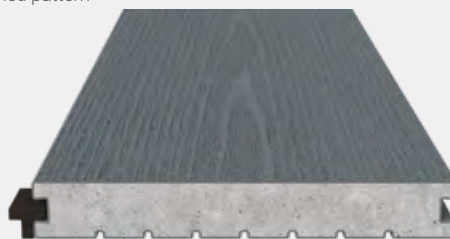

SwitchBoard®

An enduring PVCu decking solution for today's modern lifestyle.

FULLY REVERSIBLE

Choice of grooved or woodgrained pattern

SwitchBoard Ultra®

Deeply embossed 3D textured, next-generation PVCu decking.

REALISTIC DETAILING

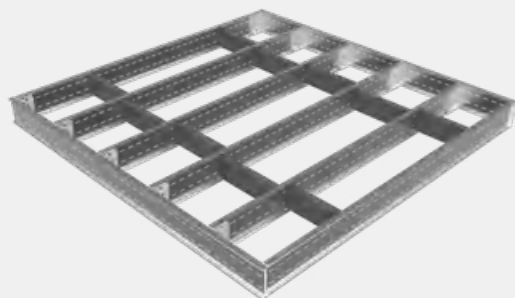

Foil laminate captures vibrant detail

Rapt

Premium foiled PVCu decking that mirrors nature in vibrant detail.

OUTDOOR
RANGE

Decking Subframes

Maintenance-free strength and stability from the ground up. Available in aluminium or steel.

Balustrades

The UK's only sculptured PVCu balustrade system and the perfect finish for any decking project.

Fencing

A choice of 10 colours across 3 PVCu styles, offering a robust alternative to timber fencing.

OUTDOOR
RANGE

GARDEN ROOMS

Created using premium products from the Liniar range, Spaces garden rooms are secure, stylish and fully-customisable. Over 50 years of extrusion excellence brought together in a single Space.

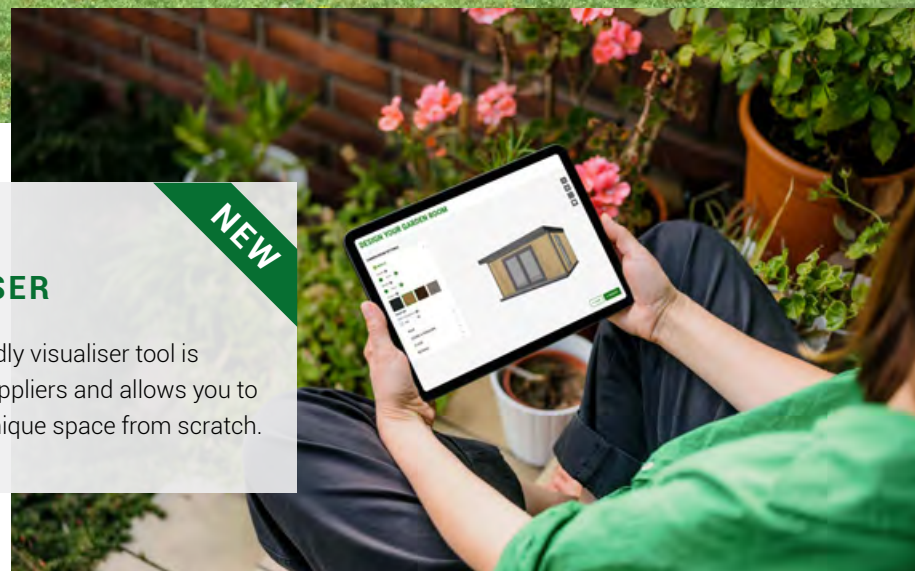

Spaces

GARDEN ROOMS

Spaces are built to your bespoke requirements, so each unique space is truly your own creation. Take inspiration from these illustrative configurations showing layout, size and usage possibilities.

VISUALISER

Our user-friendly visualiser tool is available to suppliers and allows you to design your unique space from scratch.

NEW BI-FOLD OPTION

Width: 2m
Depth: 2.9m

MICRO

The addition of glazing allows your Spaces room to be flooded with natural light, making it a cozy little retreat for work or study. Maximise your productivity with a quiet space where you can think clearly and let the ideas flow.

Width: 2.9m
Depth: 2.9m

LIVING

Looking for extra space to relax and watch a movie, or binge a series without being disturbed? Spoiler alert – this configuration is ideal for use as a home cinema, or even somewhere to lose yourself in a good book.

Width: 4.1m
Depth: 2.9m

ENTERTAIN

If you love to cook but don't have a spacious dining room for entertaining guests, this could be the ideal solution. Create a gorgeous space where your culinary skills can be appreciated in comfort, and you can play the perfect host to friends and family.

Width: 3.5m
Depth: 3.8m

GYM

Does the thought of travelling to the gym or exercising in a crowded environment come between you and your health goals? Create your own fitness haven steps from your home, making it much more convenient to establish an effective exercise routine.

Width: 2m
Depth: 2.9m

SPORTS

Whether it's indulging your competitive side gaming with friends, or watching sporting events without distraction, this configuration is ideal for creating a lively sports bar atmosphere with the benefit of being a stone's throw from home.

PILING RANGE

PVCu piling systems by Liniar contain recycled material and offer a wide range of advantages over traditional steel, timber or concrete piling including cost, durability, ease of handling and installation benefits.

OUTDOOR
RANGE

Piling

The only PVCu piling system to be fully designed and manufactured in-house, in the UK. A variety of styles, lengths and a versatile range of ancillaries are available ex-stock to order direct from our UK factory.

PVCu piling is a sustainably manufactured barrier for ground or water retention. Versatile enough to be used for permanent applications such as pond and lake reinforcement, or for temporary use; for example, trench shoring.

LOG PILE

Log pile is intended to replicate the appearance of timber logs. Comprising three 'logs' extruded together from PVCu with a wood composite finish, log pile is ideal for applications where a 'hard engineering' solution is required but there is a desire for a 'soft engineering' appearance.

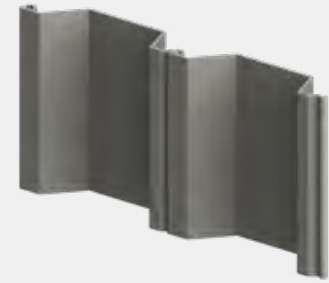

STANDARD PILE – BOX FORMAT

Linlar standard piling is offered in two formats, of which box format offers the strongest sheet pile configuration with the deepest profile. Due to its supreme strength, box format is generally used for higher retained heights or where greater strength is required.

STANDARD PILE – Z RIBBED

A general purpose medium strength pile, Z-ribbed piling covers slightly more ground per pile than box format. Linlar Z-ribbed piles have a shallower front-on profile, interlocking to form a solid web.

FULL PAN PILE

Designed to replicate the look of steel sheet piling, Linlar full pan pile is extremely versatile and easy to install. With its distinctive flat back profile, Linlar full pan pile is perfect for trench shoring, as well as bank retention and restoration in a wide range of projects.

LIGHTWEIGHT

Is lighter than steel, so easier to transport and handle and install.

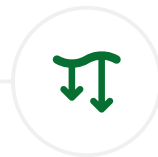

NO SPARKING RISK

Carries a Class 1Y Fire Rating

ROBUST

Resistant to rot, rust, marine borers and salt water.

DEEP USE

Has been installed to depths of more than 11 metres.

VERSATILE

Can create curved walls. 90° corner pile is available.

SUSTAINABLE

Contains recycled material and has a lower carbon footprint when compared to steel.

LEADERS IN EXTRUSION EXCELLENCE

+ £60M INVESTMENT

WORLDCLASS HEADQUARTERS

With 50+ years of extrusion expertise, Liniar reliably delivers at scale while meeting exacting quality standards. As the UK's most invested systems house, it has received over £60M from parent company Quanex since 2015, enabling continuous investment in the latest manufacturing technology.

At more than 73 thousand ft² and equipped with 33 cutting-edge extrusion lines running 24/7, our

Extrusion Hall is at the heart of operations. We have the capacity to process 280 tonnes of raw material per hour, delivered directly from our twin Mixing Plants, which offer one of the largest PVCu mixing capacities in Europe.

In 2024, we invested over £3M in machinery for our Extrusion Hall and have a policy of proactively upgrading well before necessary to maintain the highest standards of quality, efficiency and reliability for our customers.

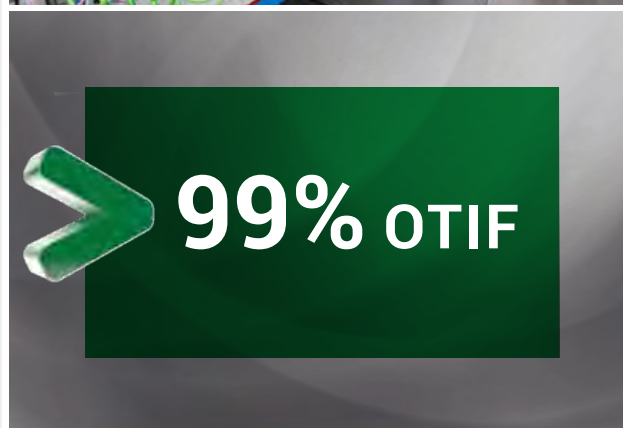

Liniar's manufacturing facilities are BS EN ISO9001 accredited, meeting the globally recognised British Standards Institution (BSI) requirements for quality management systems. Our products are tested to the highest BSI standards and regularly audited by an independent body. Liniar proudly boasts an industry-leading 99.94% conformity rate, meaning Liniar fabricators experience high levels of customer satisfaction and extremely low levels of disruption to production and planning through defects.

EFFICIENT LOGISTICS, PROVEN RELIABILITY

Liniair's Denby HQ is home to a 178,000 ft² warehouse holding close to 10,000 stocked items while maintaining sufficient headroom capacity to grow as fast as our customers grow. Our logistics team processed almost half a million order lines in 2024, and supported by a fleet of over 30 vehicles, delivered to customers nationwide

ALL WITH AN ON TIME, IN FULL (OTIF) PERFORMANCE CONSISTENTLY ABOVE 99%.

We help you keep your business operating smoothly, so you can safeguard your reputation as a reliable supplier and deliver quality service to your own customers.

ADVANCED FOILING FACILITIES

Liniair's in-house Lamination Hall features advanced systems for temperature and humidity control, creating the optimal environment for superior curing results all year round. The facility has recently seen over £3.5M of investment in profile wrapping technology from world-leading foiling and adhesive specialists WPR-TAKA, with bespoke machinery from the high-end Luna and Luna-R series expanding our existing lineup.

Members of the WPR-TAKA team have worked closely with Liniair, as we've developed and refined profile wrapping processes that deliver a durable finish across both our PVCu and aluminium ranges. This ensures profiles that cut, weld, and assemble smoothly without compromising the foil integrity, and enables the seamless, perfectly colour-matched coordination of different materials on projects – all with a single point of contact for convenient ordering.

Running two specials lines for made-to-order products, our already exceptional lead times can be accelerated for express delivery using three special service tiers allowing Liniair customers to cater to diverse requirements quickly.

ENVIRONMENTALLY RESPONSIBLE SUPPLIER

SUSTAINABLE MANUFACTURING

Liniar is certified for the latest BS EN 14001 Environmental Management Systems, thanks to a continued focus on sustainability, and boasts a decades-long track record of sending zero operational waste to landfill.

Our 2.1% production scrap rate is phenomenally low within the industry, and many of our ranges contain recycled components using material generated in the extrusion processes as part of our circular waste management efficiencies.

2025 saw the installation of advanced solar technology at our Denby HQ making huge progress, with the completed project set to

generate 7% of our annual energy needs cleanly. This initiative supports our ongoing Carbon Reduction project and will see the installation of almost 3,000 solar panels reducing our carbon output by close to 300 tones in year one alone!

ENERGY EFFICIENT PRODUCT DEVELOPMENT

The Future Homes Hub unites partners to advance the homebuilding sector's climate and environment plan - Future Homes Delivery Plan. As an associate member, Linar is committed to developing products that easily allow Building Regulation compliance, including enhancing buildings' energy performance for reduced CO² footprints.

ENHANCE YOUR SUSTAINABILITY CREDENTIALS

By tackling sustainability on two fronts – manufacturing processes, carbon reducing products – Linar is a responsible supplier supporting the UK's journey towards a Net Zero future.

LINIAR APPROVED PROGRAMME

As a Liniar fabricator you can apply to join the Liniar Approved programme, which includes training, technical support and an auditing process. The programme was established to help guarantee our customers fabricate Liniar windows and doors to the highest standards using the correct components.

INDUSTRY EXPERTS OFFERING TAILORED SUPPORT

Our in-house teams are made up of highly knowledgeable, passionate, and talented individuals – **always prepared to go the extra mile to deliver the Liniar experience.**

SALES

Combining deep product knowledge with industry insight to deliver honest, solution-focused support. From first contact to final delivery, the Sales team provide transparent guidance and dependable partnership every step of the way.

CUSTOMER RELATIONS

Always on hand with responsive, expert support through clear communication and flexible solutions - building lasting relationships with a dedicated contact who truly understands your needs.

TECHNICAL SERVICES

Hands-on support from tooling setup to on-site training and performance calculations. Ensuring smooth integration, optimised performance, and trusted engineering advice tailored to your specific project needs.

DESIGN & DEVELOPMENT

Combining customer feedback with market intelligence, Liniar's design process ensures award-winning, market leading products. Our Design department fosters an inclusive culture and encourages open idea-sharing, driving creativity and efficiency across the team.

FABRICATION

Made-to-order products and kits crafted to provide consistent quality and precision, backed by reliable on-time delivery. With responsive communication and expert support, the Fabrications team help you meet deadlines confidently - without compromising craftsmanship or performance.

TESTIMONIALS

After 40+ years in the industry, we know quality – and Liniar delivers every time. We have been a Liniar customer since 2011 and their PVCu system is the most technically advanced and installer-friendly on the market. Their service is consistently reliable, even at scale. Liniar stands out as a leading supplier for Pearl, with innovation and regular deployment of new and exciting products, we know we can truly depend upon them to support and grow our business.

Jeff Walsh, Chief Executive Officer

PEARL WINDOWS

Liniar's system gives us total confidence in the quality we deliver. The entire product range is reliable, versatile, and helps us meet regulations with ease. Their products back the promises we make to customers across every sector - trade, commercial, social housing, and new build. A truly dependable partner.

Martin Linden, Chief Operating Officer

WINDOW SUPPLY COMPANY

Switching to Liniar was 100% the right decision. The onboarding support was seamless, and their team made the transition effortless. We're continually impressed by the product range, quality, and standout aesthetics - backed by reliable service that delivers consistently. Liniar sets the standard for great suppliers.

Emma Garrard, Managing Director
